HOT WATER SOLUTIONS FOR THE LAUNDRY INDUSTRY

Hot water is an essential component in the commercial laundry business. ECWS and RBI are proud to partner together and offer our products and expertise to the laundry industry. Together ECWS and RBI offer the full product selection and support of a recognized leader in the boiler industry along with laundry industry expertise.

Reputation: As a true manufacturer, RBI has tens of thousands of heaters in operation throughout the world. Our heaters have proven themselves in some of the most demanding installations anywhere. Furthermore we have a full support network in place to assist you after the sale

Products: RBI offers a full portfolio of water heating solutions. This allows clients to select a water heater that suits their operations demands, efficiency levels and budget. Product selections include:

- » Futera Fusion – Fully condensing up to 98% operating efficiency water heater
- » Futera FIII – Sealed and pressurized up to 88% operating efficiency water heater
- » Dominator – Fan assisted up to 85% operating efficiency water heater
- » Economy Series – Atmospheric up to 81% operating efficiency water heater

System Engineering: Based on actual usage information like the washer mix and operating temperatures the engineering team can calculate precisely specific hot water demand in terms of heater size and storage tank. ECWS uses SIZE NET Software to accurately size each water heating system for specific applications.

System Installation: ECWS proudly offers all clients the option to have certified and experienced team install RBI water heaters anywhere in the United States. ECWS has pre-plumbed systems available to facilitate installation and minimize costs

After Sales Service and Support: ECWS and RBI do not believe that our responsibility ends when a water heater leaves the factory. All clients have a dedicated team of technicians and engineers available 24/7 at 1-866-513-7170

Availability: ECWS maintains a full inventory of Heaters, storage tanks and accessories, available to ship at any time.

Value: ECWS direct relationship to RBI ensures that our clients receive maximum value on each purchase.

Our company philosophy can be summed up in the following words:

Service. Efficiency. Support.

DESIGN AND ENGINEERING

Our design and engineering team is dedicated to quality, efficiency and value. In each project we undertake, we properly calculate the hot water demand based on fixture count and on site conditions. We can offer several solutions at various efficiency and price levels to fit each projects unique requirements and budget.

- » System sizing and engineering
- » Customized system efficiency and footprint
- » Ability to meet and exceed customer needs

ECWS is a complete one-stop-shop for hot water and water quality needs. We work with our clients to engineer a solution that fits their needs for a specific project.

- » Water heaters ranging in efficiency from 81% to 98% operating efficiency
- » Water treatment solutions including water softeners, reverse osmosis systems, and “indirect” water heating
- » A wide selection of standard and custom tank sizes to fit within any foot print restrictions
- » A wide “ready-to-ship” inventory of boilers and tanks to tackle emergency projects

PROJECT MANAGEMENT

We offer local, regional, national coverage and support. Our expertise is at our client’s disposal to handle the toughest assignments. We utilize the latest technology and tools to expedite each project and maximize value for our clients.
